

c. warmth, water
light, water, germination

q. which tile is most ~~dominant~~ ^{permeable} - Perma permeable

B. ^{Tiles} otherwise it won't be a fair test.
Tiles are all the same shape but wraps of rock aren't

c. slate

As slate was the least permeable, no water passed through, therefore the wall remains dry.

D. ^{ie} I will keep the water source the same.

Dii ^{which} which tile is the slippiest (the force needed to move the shoe)

q. n (DOR E)

B. 1. The moon orbits the Earth
2. The Earth spins on its axis

Dear Paddyma

Please accept my poetic thanks for the pretty fruit pastels
pear, pineapple, peach and plum tasting.

I put more pastels in my palm, than P's on this page,
placed the pastals in my mouth,

Their fizz was pleasant,

Their gell was prime,

Though the coolers were pleasing to my pupils.

Untill papa playfully pursued me practically
Snatching the Pastels and put them in his pocket!

May I pleasantly say thank you again!

Lots of love

Sagar

Science SAT

1 A. Glass as it would break, because its fragile.

B. It will sound quieter

C. christine can hear the triangle because the sound waves are causing vibrations ~~with~~ or which are travelling up the pipe.

2 a. False

It's not possible, as it is an irreversible change.

B. Thermal

Plastic is a thermal insulator ~~which~~ which means heat doesn't ~~travel~~ travel through it easily therefore the handle remains cool.

C Solid

D. Liquids can always be poured.

E. A

3A (in book)

B1. He should keep the same hoop.

B2. ~~the~~ Less are growing by the hedge, because the hedge uses all the nutrients.

C. do the same test in a different field.
